

Dmytro Stryzhakov

Frontend Engineer | React | Next.js | TypeScript | Micro Frontend Architecture

Valencia, Spain | +380 93 558 0645 | +34 605 541 760 | dima.strizhakov@gmail.com

LinkedIn: <https://www.linkedin.com/in/dmytro-stryzhakov>

SUMMARY

Frontend Engineer with 6+ years of commercial experience shipping production web applications in React and TypeScript, from early architecture decisions through to release. Strong in Micro Frontend architecture, reusable component libraries, and complex, stateful UI. At DP World, built a freight rate-management platform from scratch as one of two frontend developers, owning frontend architecture from discovery to production. Comfortable ramping quickly on unfamiliar codebases and adapting across domains and stacks. Open to Frontend / Front-End Engineer roles, including full-stack-leaning ones, remote or on-site in Spain.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3 (Flexbox, Grid)

Frameworks & Libraries: React.js, Next.js (SSR/SSG/ISR), Node.js, Electron

State Management: Redux, Redux Toolkit, Redux-Saga, Redux-Thunk, MobX, React Query (TanStack Query)

Styling & UI: Tailwind CSS, Sass/SCSS, PostCSS, CSS Modules, BEM, styled-components, Material UI, MUI X (Data Grid), Responsive Design, Cross-browser Compatibility, Accessibility (a11y), Figma

Graphics & Rendering: HTML5 Canvas, node-canvas, fabric.js, 2D graphics, Server-side rendering

Data & APIs: REST API (Axios), GraphQL (graphql-request), MapLibre GL

Forms: React Hook Form, Formik

Testing: Jest, React Testing Library, Cypress, Unit Testing, Integration Testing, End-to-End (E2E) Testing

Build & DevOps: Webpack, Module Federation, Vite, Docker, CI/CD (GitHub Actions, GitLab CI), Git, Storybook

AI Tools: Claude Code, Cursor

Architecture & Practices: Micro Frontend Architecture, Feature-Sliced Design (FSD), Design Patterns, Algorithms & Data Structures, Performance Optimization (Core Web Vitals), Internationalization (i18n), Code Review, Agile/Scrum

EXPERIENCE

Frontend React Developer, DP World

Odesa, Ukraine (Remote) | May 2023 - Present

Tech: React, TypeScript, Next.js, Redux, React Query, REST API (Axios), GraphQL, Material UI, MUI X Data Grid, MapLibre GL, React Hook Form, SASS, React Testing Library, Micro Frontend Architecture, Webpack Module Federation, Feature-Sliced Design (FSD), Docker, CI/CD, AI Tools (Claude Code, Cursor)

- Built a freight rate-management platform from the ground up as one of two frontend developers, owning architecture from discovery through release: structured the codebase with Feature-Sliced Design and split the UI into independently deployable micro frontends on Webpack Module Federation.
- Shipped the customer-facing booking application used by over 70,000 users per day, covering rate search and filtering, MapLibre GL route visualization, and a multi-step booking flow.
- Delivered an internal CRM for customers, freight rates, and bookings: complex stateful interfaces and MUI X data grids backed by Redux and React Query over REST (Axios) and GraphQL, with React Hook Form handling multi-step validation.
- Established a shared component library and rate-detail cards adopted across the platform, speeding up feature delivery and keeping the UI consistent.
- Optimized rendering of large rate datasets through code splitting, memoization, and virtualized data grids, tracking Core Web Vitals to hold performance as the product grew.
- Rolled out internationalization and accessibility across the booking flow, including keyboard navigation, ARIA attributes, and localized content.
- Automated builds, tests, and deployments with Docker and CI/CD (GitHub Actions, GitLab CI), covered critical flows with React Testing Library, and adopted Claude Code and Cursor for scaffolding, refactoring, and code review.

Freelance Frontend Developer, Self-employed (Contract)

Odesa, Ukraine (Remote) | January 2023 - June 2023

Tech: Next.js, React, TypeScript, React Query, REST API, Tailwind CSS, Vite, GSAP, Recharts

- Built responsive web applications, admin dashboards and landing pages for clients using Next.js and Tailwind CSS, including a data-heavy analytics dashboard with role-based access and interactive charts.

JavaScript Developer, AB Soft

Odesa, Ukraine | May 2021 - December 2022

Tech: JavaScript, TypeScript, Node.js, HTML5 Canvas, node-canvas, fabric.js, Server-side rendering, 2D graphics, React, MobX, styled-components, Electron, Docker, Jest, Storybook

- Built and shipped features across a unified business-communications suite (messaging, video, voice, contact-center) delivered as both a desktop (Electron) and web application, using React, TypeScript, and MobX with styled-components.
- Contributed to a UI rendering engine for a backend service that mixes video streams in real time, actively building and integrating a backend UI SDK.
- Rendered dynamic 2D graphics and overlays with HTML5 Canvas and node-canvas / fabric.js, including server-side rendering composited onto live video streams.
- Developed the desktop client with Electron and Node.js, including integration with HID hardware devices (headsets/handsets) for call control.
- Wrote unit tests with Jest, maintained UI components in Storybook, and worked within a Docker-based local and CI environment.
- Resolved bugs and improved stability across an actively used production application serving over 5 million users.

React Frontend Developer, Andersen Lab

Odesa, Ukraine | November 2019 - May 2021

Tech: React, TypeScript, JavaScript, Redux, Redux-Thunk, Redux-Saga, REST API, Formik, Jest, Cypress, SASS, PostCSS, CSS Modules, BEM, Storybook, Node.js, Agile

- Delivered React single-page applications across three client projects in an Agile environment, integrating REST APIs and handling loading, error, and validation states in the UI.
- Real-estate search and rental platform (Asia): built property search and rental UI with React, Redux (Redux-Thunk), and TypeScript, consuming REST API endpoints for listings, filters, and bookings.
- Employee web portal: developed personal-account, vacation-approval, and events pages; raised quality with integration and unit test coverage (Jest, Cypress).
- User personal cabinet (SPA): built new features and components with React, Redux, and Redux-Saga; handled complex forms (Formik) and REST API integration with a Node.js backend.
- Styled responsive interfaces with SASS and PostCSS, applying CSS Modules and BEM to keep styles scoped, predictable, and maintainable across teams.

EDUCATION

Master's degree, Computer Science

Odessa National Academy of Food Technologies | September 2019 - December 2020

Bachelor's degree, Computer Science

Odessa National Academy of Food Technologies | September 2015 - May 2019

LANGUAGES

Ukrainian (Native), Russian (Native), English B1, Spanish A1
